

Object:

The ultra-modern office building in Lüneburg Hansekontor provides on 2.190 m² creative architecture and innovative technical features, combined with the recent guidelines of the energy efficiency regulations. The energy-efficient hot water supply is realized with CLAGE instantaneous hot water heaters. Energy saving min instant water heaters – in some cases combined with the touchless tap Lumino – are installed beneath the hand wash basins. The electronic instantaneous water heater DCX provides the right water temperature in the showers. Hot or cold drinks can be prepared fast and easy due to the drinking water system ZIP HydroTap®.
