#### Description

- Hydraulically controlled instant water heater (oversink model) with compact design for the energy-efficient hot water supply of a washbasin or a kitchenette
- > The full heating capacity turns on automatically as soon as water flows through the unit
- > Efficient flow technology for an optimum water jet and economical water consumption
- > The efficient bare wire heating system IES® with replaceable heating cartridge provides an extended service life and easy maintenance
- > Ready to plug in (3.5 kW) and power cable (≥ 4.4 kW), length: ≤ 65 cm
- > Vented design, only suitable for open-outlet taps
- > Aerator insert for tap adapter M 22/24 at the tap is included
- $\,>\,$  Also available as a complete set with tap: M/SMB

## Saves up to $85\,\%$ energy compared to conventional small storage heaters.

The E-compact instant water heater features an economical operation. The water is heated directly as it flows through the unit. Hot water is not stored in a tank, which saves standby energy that would be otherwise required.

#### Aerator CSP3 or CSP6 (included)

The aerator at the tap supports the energy- and water-saving operation of the compact instant water heater. The new special CSP aerators mix air into the water and thus create a uniform water stream that does not splatter but softly cascades down.
